Closing Date:

Permanent, 40 hours/week

Direct report to: VP of R&D and Engineering

---

### **About Comprod:**

As a market leader in RF solutions (from indoor and outdoor antennas all the way to filter products and RF systems), Comprod puts innovation and customer satisfaction at the core of its business strategy. Over the past 40 years, we have set ourselves apart by adapting our offering to our client needs and demands, while anticipating future industry trends and opportunities.

### **Job Description:**

#### **Duties of the Draftsperson:**

- Develop and prepare engineering models and drawings based on preliminary concepts, sketches, engineering calculations, specifications and other data
- Provide technical support to the design team
- Perform drawings requested by the project managers

#### **Requirements of the role:**

- Technical drawing training
- A minimum of 3 to 5 years of relevant work experience
- Expertise of Auto CAD and Inventor 3D software. (Candidates with excellent knowledge of SolidWorks will be considered)
- Knowledge of the Microsoft Office Suite (Word, Excel, Outlook)
- Knowledge of a desired 3D presentation software (SketchUp)
- Organizational skills, good planning, discretion and reliability
- Ability to work under pressure
- Timeliness
- Collective group insurance plan
