

In-Building Wireless Market Constantly Changing to Meet Demand

Comprod is Engineering the Know How:

Our latest innovation, the Ultra-Wideband In-Building Antenna has been designed for mounting on a ceiling or gyprock wall without the need of a ground plane. This in-building antenna is entirely flat and gets integrated into the ceiling almost invisibly. The antenna's main application includes: usage for Distributed Antenna Systems (DAS) for Public Safety or LTE communication in multiple stories of a building.

- Available in 130-1000 MHz and 380-3000 MHz
- VSWR remains the same, regardless of the positioning of cable
- Nominal gain of unity
- Pricing: please contact our sales team at 1-800-603-1454
