

205-70 UHF

The Circular Polarized Antenna is available for the VHF, UHF and 700/800/900 frequency bands. These antennas are wide-band and unity gain. They are constructed from high strength, corrosion resistant aluminum alloy and stainless steel. All our antennas can be completely customized to your particular applications.

- Each antenna has a rugged design to withstand harsh environmental conditions.
- DC ground for lightning protection.
- Please contact our Technical Support team for consultation.

Electrical Specifications	205-70 UHF	
Frequency Range, MHz	406-512	
Nominal Gain	Unity	
Bandwidth: 1.5:1 VSWR, MHz	60	
Polarization	Circular	
Power Rating, Watts	100	
Nominal Impedance, Ohms	50	
Lightning Protection	DC Ground	
Standard Termination	Type N Male	
Mechanical Specifications	205-70 UHF	
Max. Length, in (mm)	38 (965.2)	
Mast Diameter, in (mm)	1.057 (26.85)	
Weight, lbs. (kg)	2.2 (1)	
Order Information	406-470 MHz	470-512 MHz
Model Number	205-70 *2	205-70 *5

205-70
