

205-70*1

The Circular Polarized Antenna is available for the VHF, UHF and 700/800/900 frequency bands. These antennas are wide-band and unity gain. They are constructed from high strength, corrosion resistant aluminum alloy and stainless steel. All our antennas can be completely customized to your particular applications.

- Each antenna has a rugged design to withstand harsh environmental conditions.
- DC ground for lightning protection.
- Please contact our Technical Support team for consultation.

Electrical Specifications	205-70*1
Frequency Range, MHz	138-174
Nominal Gain	Unity
Bandwidth: 1.5:1 VSWR, MHz	60
Polarization	Circular
Power Rating, Watts	100
Nominal Impedance, Ohms	50
Lightning Protection	DC Ground
Standard Termination	Type N Male
Mechanical Specifications	205-70*1
Max. Length, in (mm)	60 (1524)
Mast Diameter, in (mm)	1.5 (38.1)
Weight, lbs. (kg)	2.2 (1)
Order Information	138-174 MHz
Model Number	205-70*1

205-70
